

# 8 x 10.5 in Magazine Template

Export all print ready files to PDF as PAGES not Spreads.

Images should be exported at 300ppi for best results.

Be sure to check the dimensions on the exported file.

An 8 x 10.5 inch magazine with a .25 inch bleed should have a final size of 8.5x11in.

When possible work in a CMYK Color Space. If you are working in RGB the colors will have to be converted and may not look the same when printed.

4901 Indian School Rd. NE  
Salem, OR 97305  
PO Box 12008  
Salem, OR 97309

*Hint: Leaving a little extra space around the edge of objects makes text easier to read and keeps the letter from feeling cluttered.*

## Bleed .25 inch

Extend all backgrounds and images that touch the edge of the page over the bleed. This area will be cut off and will not show in the finished magazine.

## Margin .25 in

Do not place text, adds, or images within this area with the exception of images that extend all the way out to the bleed.

## Text Margin .5 in

Do not place article text past this point especially text that is near the spine of the magazine.

## Advertisement

This is 1/4th page Add.  
Adds can go all the way out  
to the .25in margin

Buy our stuff!  
Act now and get %10 off!

No need for bleed  
in the center of the  
magazine pages.

Bleeds are only  
needed on the  
outer edges of  
pages.
